PROFESSIONAL SUMMARY

Electronic Engineering student at Pontificia Universidad Javeriana with a background in hardware design, embedded systems, and digital electronics. Hands-on experience in C/C++ and Python programming, PCB development, digital systems design, and rapid prototyping, including work as a teaching assistant for two embedded systems courses. Creative and analytical, with the initiative to propose innovative solutions. Collaborates effectively in teams, adapts easily to new situations, and takes on new challenges with responsibility and commitment to each project's goals.

PROFESSIONAL INTERESTS

Hardware design, embedded systems, digital electronics, signal processing, training and applying artificial intelligence (AI) models, and IoT applications for smart, connected devices.

EDUCATION

Pontificia Universidad Javeriana, Bogotá, Colombia Jan 2023 – Present
Bachelor of Science in Electronic Engineering | Cumulative GPA: 4.3/5.0 | Expected graduation: 2027

Instituto Alberto Merani, Bogotá, Colombia Graduated 2022
High School Diploma

PROFESSIONAL EXPERIENCE

Pontificia Universidad Javeriana, Bogotá, Colombia Feb 2026 – Present
Teaching Assistant – Processor-Based Systems Design

- Support embedded systems and microprocessor course projects, including custom PCB design and development.
- Advise students on embedded C programming, finite-state machines, interrupts, and timing analysis.
- Guide students through digital system architectures and implementation strategies for embedded applications.

Self-employed, projects for independent businesses Jul 2026 – Present
Freelance Web Developer

- Develop web applications for independent businesses, from requirements definition through implementation and delivery of solutions tailored to their needs.

Programa Tú, Bogotá, Colombia Sep 2024 – Present
Academic Tutor

- Provide personalized tutoring in physics, mathematics, critical thinking, and language arts to students at Instituto Alberto Merani.

Pontificia Universidad Javeriana, Bogotá, Colombia Jan 2025 – Jun 2025
Teaching Assistant – Arduino 101

- Guided undergraduate students in working with Arduino platforms, sensors, actuators, and peripheral devices.
- Supported the development and debugging of Arduino projects, including C programming and code optimization.

LANGUAGES

- **Spanish:** Native
- **English:** Upper-Intermediate (CEFR B2)

TECHNICAL SKILLS

Programming: C/C++ (Advanced), Python (Intermediate)

HDL & Simulation: VHDL (Intermediate), ModelSim (Intermediate)

Embedded Systems: Arduino (Advanced), Raspberry Pi (Advanced), Microcontrollers (Intermediate), MPLAB (Intermediate)

Hardware Design: Altium Designer (Advanced), Quartus (Intermediate)

Simulation & Analysis: LTspice (Intermediate), MATLAB (Intermediate)

Prototyping & Fabrication: 3D Printing (Intermediate)

Operating Systems: Linux (Intermediate)

Web Development: HTML (Basic)
