📁 Portfolio: <https://nicolasgomez.dev>

TECHNICAL SKILLS

- Programming: C/C++ (Adv.), Python (Int.)
- HDL & Simulation: VHDL (Int.), ModelSim (Int.)
- Embedded Systems: Arduino (Adv.), Raspberry Pi (Adv.), Microcontrollers (Int.), MPLAB (Int.)
- Hardware Design: Altium Designer (Adv.), Quartus (Int.)
- Simulation & Analysis: LTspice (Int.), MATLAB (Int.)
- Prototyping & Fabrication: 3D Printing (Int.)
- Operating Systems: Linux (Int.)
- Web Development: HTML (Basic)

LANGUAGES

- Spanish – Native
- English – Upper-Intermediate (Berlitz English Program, 2026)

PROFILE

Electronic Engineering student with a background in hardware design, embedded systems, and digital electronics. Experienced in programming across several languages, PCB development, digital systems design, and rapid prototyping. Interested in using and training artificial intelligence models, signal processing, and IoT applications for smart, connected devices. Creative, analytical, and proactive in proposing innovative solutions. Works well in teams, adapts easily to new situations, and takes on new challenges with responsibility and commitment, always aiming to contribute to each project's goals.

ACADEMIC EXPERIENCE

Pontificia Universidad Javeriana, Bogotá, Colombia Feb 2026 – Present
Teaching Assistant – Processor-Based Systems Design

- Support embedded systems and microprocessor course projects, including custom PCB design and development.
- Advise students on embedded C programming, finite-state machines, interrupts, and timing analysis.
- Guide students through digital system architectures and implementation strategies for embedded applications.

Pontificia Universidad Javeriana, Bogotá, Colombia Jan 2025 – Jun 2025
Teaching Assistant – Arduino 101

- Guided undergraduate students in working with Arduino platforms, sensors, actuators, and peripheral devices.
- Supported the development and debugging of Arduino projects, including C programming and code optimization.

WORK EXPERIENCE

Programa Tu, Bogotá, Colombia Sep 2024 – Present
Academic Tutor

- Provide personalized tutoring in physics, mathematics, critical thinking, and language arts to students at Instituto Alberto Merani.

Programa Tu, Bogotá, Colombia Jul 2026 – Present
Freelance Web Developer

- Develop web applications for independent businesses, from requirements definition through implementation and delivery of solutions tailored to their needs.

EDUCATION

Bachelor of Science in Electronic Engineering Jan 2023 – Present
Pontificia Universidad Javeriana, Bogotá, Colombia
Expected Graduation: 2027

GPA: 4.25/5.0

High School Diploma 2012 – 2022
Instituto Alberto Merani, Bogotá, Colombia
